- Track targets

### About AirVisual, Inc.

AirVisual specializes in the management and wireless delivery of visual intelligence – including real-time video and location based data - for security, law enforcement and navigation using conventional mobile devices such as laptop PCs, PDAs and cellular phones.

# The IntelliViewer™ Mobile Command System™ Features

- Command center and mobile device coordination
- Common user interface
- Multi-agency interoperability
- Secure from end to end
- Device and network agnostic
- Managed service options
- Redundant infrastructure
- Access control for remote devices and users

**All of AirVisual's products are fully compatible with one another and integrate seamlessly.**

**IntelliViewer™**

**AirVisual Products for Safety and Infrastructure Security** AirVisual's IntelliViewer™ Mobile Command System™ makes the visual intelligence that's available at the command center accessible and useful to personnel on foot and behind the wheel - using conventional mobile devices such as laptop PCs, PDAs and cellular phones - so they can be more effective protecting the lives and property of others while staying out of harm's way.

**RoadViewer™**

**AirVisual Products for Traffic Management** RoadViewer™ is a simple, easy-to-use, wireless traffic information solution created to help manage daily roadway travel, to allow users to move more intelligently and faster with improved safety and security, to help avoid incidents and to deal with the consequences of extreme events. RoadViewer gives users the ability to see live images of local traffic cameras on a wireless PDA or cell phone or the in-dash telematic system to avoid traffic delays, choose the best route, adjust their schedule accordingly and help users get to their destination on time, every time.

**TransViewer™**

**AirVisual Products for Transportation Security** TransViewer™ from AirVisual is a mobile, wireless, multi-camera digital recording server specifically designed for public transport or private vehicle applications. TransViewer provides security personnel the ability to see into a moving vehicle in real time to insure the well being of precious cargo.
