Panasonic ideas for life

Only Panasonic can put your officers on the scene before they arrive.

Panasonic's and AirVisual's innovative, fully integrated Total Security Solution enables police officers and first responders to remotely view live/recorded surveillance video while in transit to potentially volatile situations. This world's-first technology lets them evaluate the situation and plan the appropriate course of action beforehand. By eliminating the element of surprise, they can react in the most strategic manner while greatly reducing the potential for harm to themselves or to those they intend to assist.

The Total Security Solution integrates Toughbook® notebook PCs, the Toughbook Arbitrator mobile digital video system, i-Pro professional video security systems and AirVisual's IntelliViewer remote video solution—all into one seamless system that integrates public and private sector security systems with local law enforcement departments and first responders.

The Total Security Solution also allows police officers and first responders to share information with their Command Center and others in the field via broadband communications from their vehicles' Toughbook notebook PCs and handheld devices such as PDAs and cell phones.

"All units in vicinity respond!"

It's 10:00, Tuesday morning.

A silent alarm is tripped in the bank on Main Street. The urgent dispatch call goes out from the Police Command Center. As patrol cars speed to the scene, the adrenaline is pumping. The officers don't know what to expect, but they have to proceed immediately. Are bank employees and customers in grave danger? Will the officers face a life-threatening situation? Or maybe it's just a false alarm. Unfortunately, the officers won't know until they get there.

But what if the officers knew exactly what they were facing before they arrived on the scene?

What if, right there in the patrol cars, they could see what was taking place inside the building? Imagine what a tremendous advantage it would be. Panasonic and AirVisual™ have just made it possible.

With the Total Security Solution for Law Enforcement and First Responders.

Panasonic's fully integrated Total Security Solution

Toughbook 18 Notebook PC with 10.4" LCD Touchscreen

- Wireless unit transforms into a handwriting-enabled tablet with one twist
- Officers can remove tablet from squad car and make detailed entries, then transmit information directly to the Command Center's database
- Designed to withstand rigorous use, moisture and dust; shock mounted to withstand an 11-foot drop test

Toughbook 29 Notebook PC with 13.3" Outdoor-Readable LCD Screen

- 500 Nit LCD brightness offers optimal visibility in any lighting condition
- Designed to withstand rigorous use, moisture and dust; shock mounted to withstand an 11-foot drop test
- Powered by Intel® Centrino® Mobile Technology for wireless freedom and rapid response

Toughbook Arbitrator Mobile Digital Video System

- High-performance 3CCD broadcast quality camera with 220X zoom capability
- Exclusive P2 digital video/audio recording system with high-capacity 4GB flash card memory
- Wireless microphone
- Wireless mobile receiver/transmission system with secure encryption
- Designed to withstand the jolts, vibrations and temperature extremes of the squad car

Panasonic i-Pro Intelligent & Professional IP-Based Security Solutions

- i-Pro Network Cameras—high resolution, day/night color cameras produce smooth pictures and accurate color reproduction
- i-Pro Network Recorders and Software—designed specifically for networked operations with up to 7TB of storage capacity
- Video Servers—enable the integration of conventional analog video systems and/or video devices on a networked platform

AirVisual IntelliViewer Mobile Solution

- Allows seamless integration of Panasonic's Toughbook laptops and video surveillance products
- Open architecture provides the unique ability to send and receive video/audio data from any system platform for completely seamless integration with virtually any existing municipality or facility video security system
- Provides user-friendly GUI for easy operation
