# You Have a BYOD Challenge!

THE WALL STREET JOURNAL.

## So You Want to Use Your iPhone for Work? Uh-oh.

How the smartest companies are letting employees use their personal gadgets to do their jobs

STATETECH

## How North Dakota Implemented a BYOD Program For Public-Sector Workers

In my list of Top 10 annoyances, carrying two smartphones ranks as No. 1. Having both a personal phone and a work phone is common in state government. It wasn't so bad until the smartphone...

## Wireless firms to disable stolen phones

Smartphone and cellphone thefts made up 30% to 40% of all robberies in 2011 in major U.S. cities, accounting for as many as 27,000 thefts, police say. More than 40% of all robberies in New York City involve pricey phones. And thefts are on the rise in Washington, D.C., too, where 1,611 of last year's 4,208 robberies (38%).....

# Mobility is Driving Your IT Investments

Mobile projects will outnumber PC projects

Increase in dedicated video soft clients by 2016

Tablets by 2016

Increase in mobile enterprise investments through 2015

Of enterprise will be cloud based by 2015

Maureen attends a dispersed **team video conference** from her home office

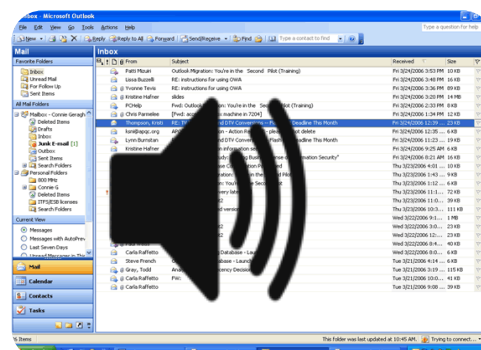

# A Day in the Life of Maureen, Citizen-Focused Key-Project Manager

Maureen drives to visit a partner working with her team,  
listens to voicemail and returns calls.  
Has new **email read to her** in the car.

# A Day in the Life of Maureen, Citizen-Focused Key-Project Manager

The partner is confused about the project. While at their location she sees with **presence** on her iPad which of her specialists are available and **IM's** them for clarification. She **quickly initiates a collaboration session**, pulls up the project plan, **shares the document** and discusses the changes in real-time.

# A Day in the Life of Maureen, Citizen-Focused Key-Project Manager

Back at her desk, Maureen receives the updated project plans from her team. Opens **CRM records in Salesforce.com**, updates partner information and **clicks to call the partner** to let them know the updated plan is on its way.

# A Day in the Life of Maureen, Citizen-Focused Key-Project Manager

After lunch – she attends a **training session via video conference**. The engagement team can join the conference from anywhere using their device of choice to hear and support citizen issues and questions in real-time.

**Getting off her flight back from her Tacoma trip,** Maureen sees with the call logs and enterprise messages on her smartphone showing who tried to reach her, she responds and continues to stay accessible

# Who Owns the Device? How Many?

Work  
phone?

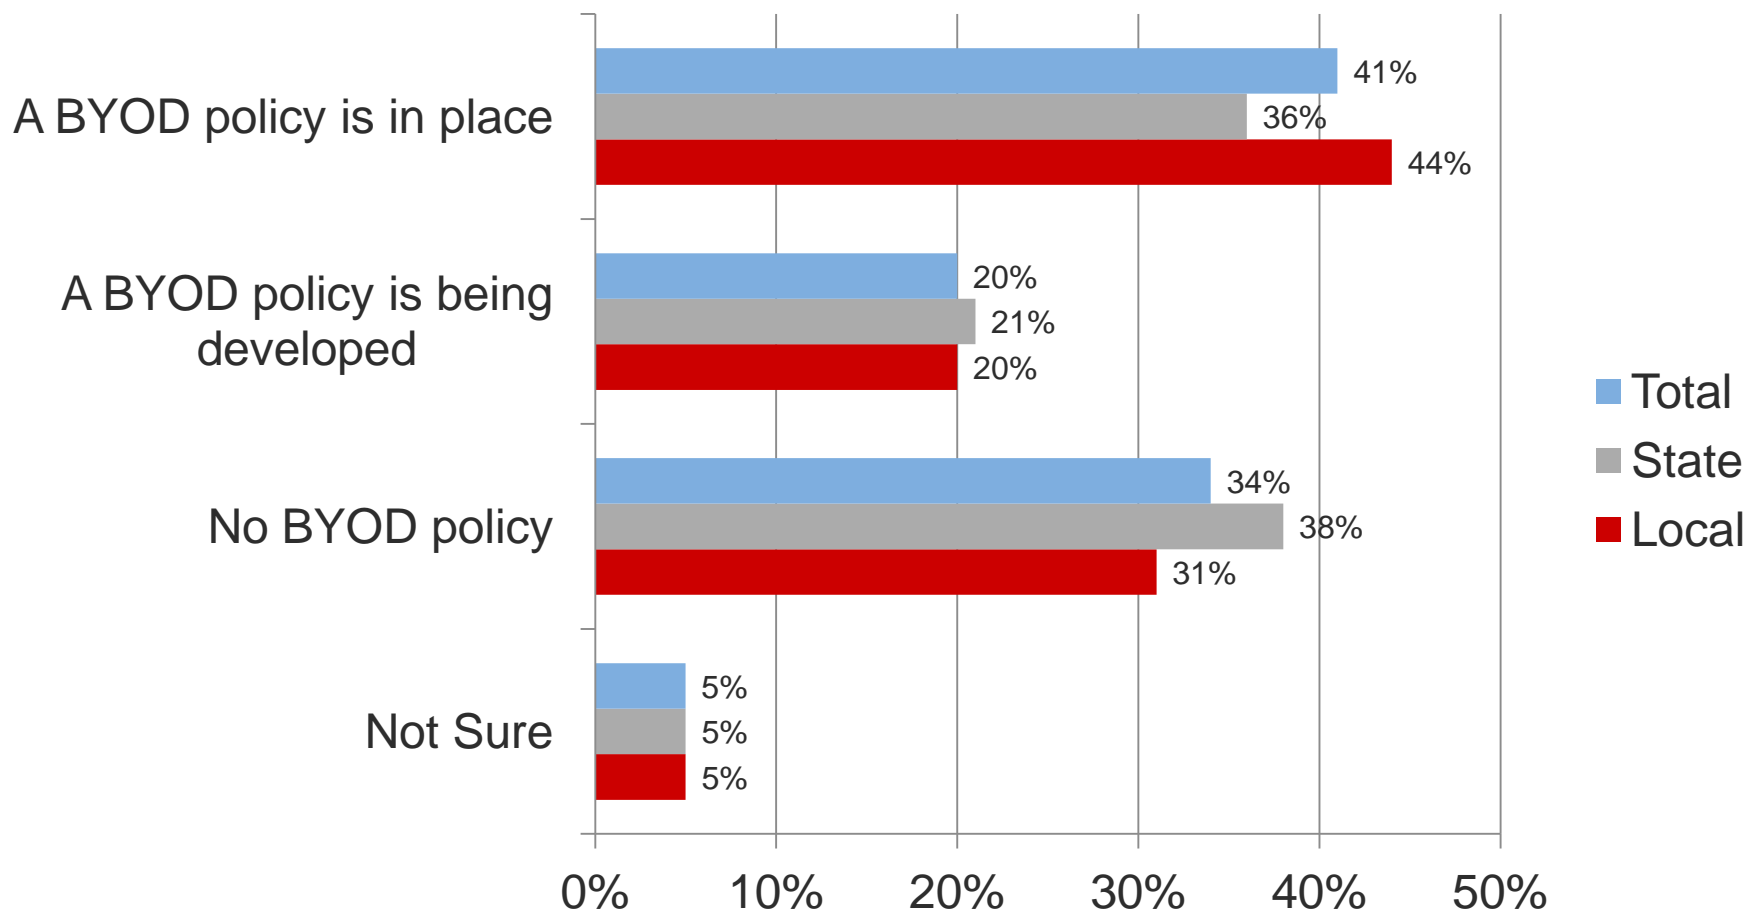

Personal  
phone?

**BYOD – Bring Your Own Device**  
means using privately owned  
wireless and/or portable electronic  
piece of equipment that includes  
laptops, netbooks, iPods, tablets,  
iPod Touches, cell and smart  
phones to support government work.

# Does your department/agency have a policy that allows BYOD for work purposes?

Source: Government Technology Survey, <http://www.govtech.com/policy-management/BYOD-Policies-Expand-State-Local-Agencies.html>

# What is State General Policy toward BYOD?

	Percent Responding
State policy prohibits BYOD	6%
No formal policy	20%
Enterprise policy permitting BYOD covering all agencies	54%
Individual agency policies permit BYOD	18%
Don't know/does not apply	2%

Source: 2012 State CIO Survey, October 2012 [NASCIO, TechAmerica, GrantThornton]

overloaded!

BYOD policy!

# BYOD challenges for government

# Implications of Inadequate BYOD Planning

- ▶ By 2015, 80% of newly installed wireless networks will be obsolete because of a lack of proper planning (Note 1)
  - New context-rich applications requiring more bandwidth
  - iPad deployments could need 300% more Wi-Fi (Note 2)
- ▶ 70% of new enterprise users by 2013, will be wireless by default and wired by exception (Gartner)
  - Average three to five devices per user each requiring capacity and contributing to the density

# Assessing Your Network's Readiness

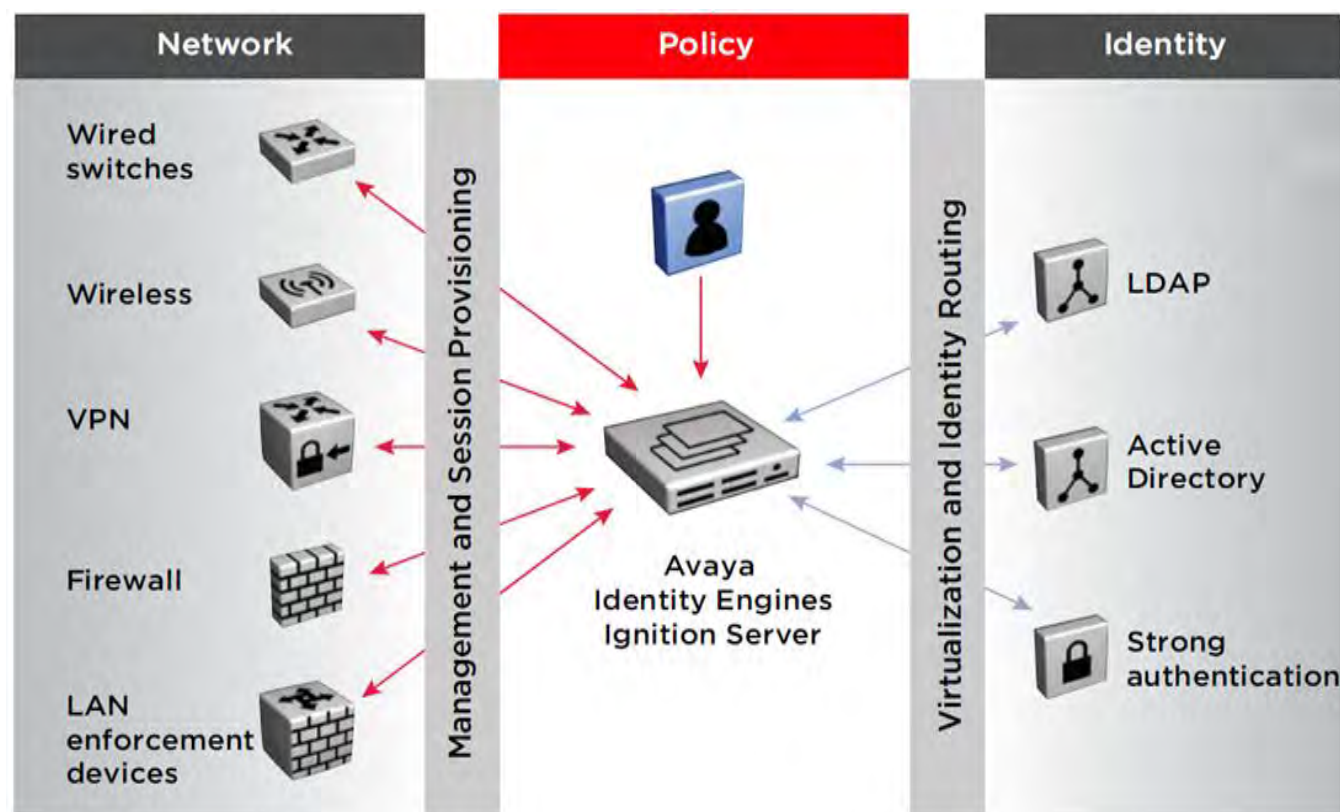

- ▶ Bandwidth
- ▶ Coverage
- ▶ Performance
- ▶ Network access and control
- ▶ Security
- ▶ Devices and applications
- ▶ Training and support

# Identity Management and Authentication

Central policy decision making needed to enforce role-based network access control for government

- ▶ Unified across wired & wireless
- ▶ Fingerprint devices+users
- ▶ Any device
- ▶ Any network
- ▶ Easy guest management
- ▶ Granular policies
- ▶ Directory federation
- ▶ Incremental and affordable

# Access Policies

## Case 1

*Employee with gov.  
supplied laptop*

IF  
(identity = employee)  
  
AND IF  
(device = gov laptop)  
  
AND IF  
(medium = wired)  
  
THEN  
**ALLOW & GRANT  
FULL ACCESS**

## Case 2

*Employee with  
personal iPad*

*(same gov. credentials)*

IF  
(identity = employee)  
  
AND IF  
(device = personal iPad)  
  
AND IF  
(medium = wireless)  
  
THEN  
**ALLOW & GRANT  
LIMITED ACCESS**

# Access Control vs. Mobile Device Management

Key Requirements	Network Access Control	Mobile Device Management
Enables policies to determine who accesses the network, where, when, how and with what type of device	✓	-
Posture and health checking to prove identity and health of device	✓	-
Interrogates endpoints for security and compliance and grants appropriate levels of network access	✓	-
Create guest user accounts for access to specific network resources for a designated time period	✓	-
Powerful reporting applications that enable in-depth analysis of network activity including ingress and usage	✓	-
Push password and security policies to mobile devices	-	✓
Push out configurations settings to mobile devices	-	✓
Provides a mobile device application storefront for recommended or required corporate applications	-	✓
All private information can be wiped from mobile device if lost or stolen	-	✓

# Guest Access

The screenshot shows the Avaya Ignition Guest Manager interface. At the top left is the Avaya logo. To its right, the title "Ignition Guest Manager" is displayed. Below this, a "Term of Use" section contains a message from "The Management" regarding free internet access and terms of use. The main part of the form is titled "Register New Guest User" and includes several input fields: "First Name", "Last Name", and "User Name", each marked with a red asterisk. Below these is a "Send Notification" section with a checked checkbox for "Guest User E-mail" and an unchecked checkbox for "Password only to guest user mobile phone (digits only)". The mobile phone section includes a text input field and a dropdown menu for "Carrier" currently set to "T-Mobile". At the bottom of the form are "Submit" and "Reset" buttons. A legend at the bottom left indicates that red asterisks denote required fields and a red dagger symbol indicates that the recipient's cell phone must have SMS enabled.

**AVAYA** Ignition Guest Manager

**Term of Use:**  
Dear Guest,  
  
We are delighted to provided free Internet access at our location. However, pls note that upon clicking "Submit", you acknowledge that you accept the following terms and conditions...  
  
Enjoy!  
The Management

**Register New Guest User**

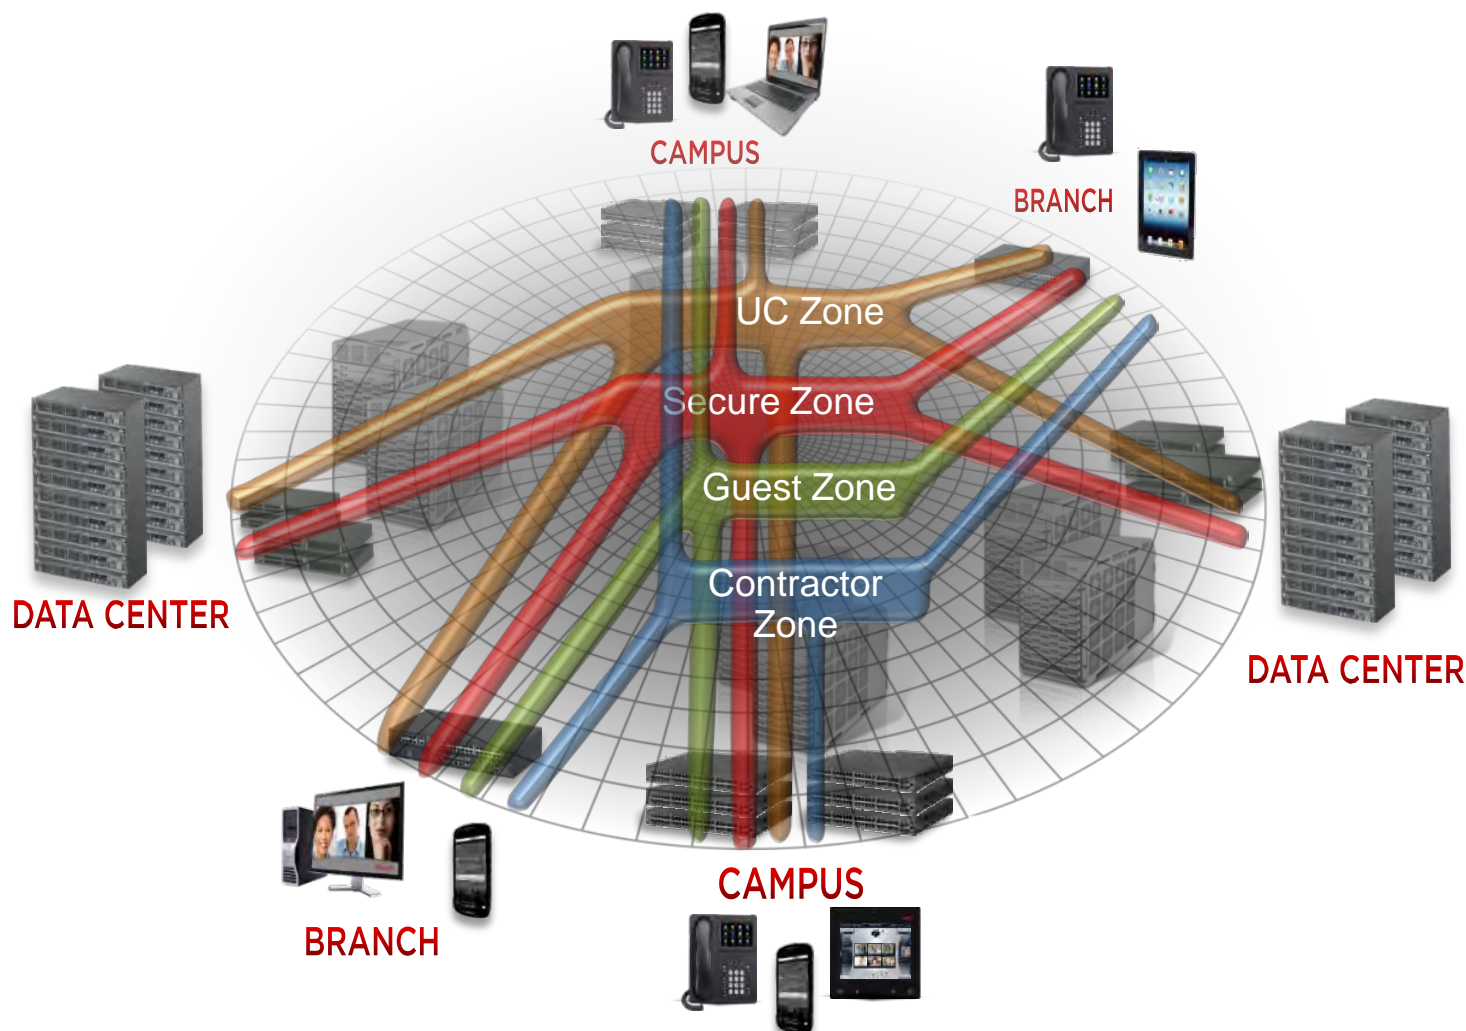

\* First Name:   
\* Last Name:   
\* User Name:   
\* Send Notification: ☒ Guest User E-mail   
☐ Password only to guest user mobile phone (digits only): †  
 Carrier:

\* Required  
† Recipient's cell phone must be SMS (text message) enabled

Simple enough for the front/security desk to manage!  
Standardize access policies, time-of-day, restricted locations
