

Govtech.com Security News Podcast – Episode 1:

InfoSec News, Mash-Up Security, Public eRecords Integrity

Tuesday, May 13, 2008

Summary

- Millions of emails missing from the White House, and the explanation is not necessarily political.
- What's a mash-up? A great way to offer lots of information in one place. David Bolker, cofounder of the OpenAjax Alliance, and CTO of IBM Emerging Internet Technologies explains how mash-ups challenge security.
- Public eRecords integrity with Anne Weismann, Chief Counsel, Citizens for Responsibility and Ethics.

Podcast sponsored by [Symantec](#), [SonicWall](#), [ESET](#), and [Emergency Management Magazine](#).

Notes

[OpenAjax Alliance](#) is an organization of leading vendors, open source projects, and companies using Ajax that are dedicated to the successful adoption of open and interoperable Ajax-based Web technologies. The prime objective is to accelerate customer success with Ajax by promoting a customer's ability to mix and match solutions from Ajax technology providers and by helping to drive the future of the Ajax ecosystem.

White Paper mentioned in the program: [SMash: Secure Cross-Domain Mash-ups on Unmodified Browsers](#)
