

Do more with your Now connection.

Experience the next generation of high-speed wireless data. Get it on the Now Network.™

Sprint 3G/4G USB Modem

U300

Connect using the U300 and experience 4G speed, where available, for even faster access to email and the Internet.

For you, that might mean participating in a video conference from anywhere in the coverage area while sharing and receiving large data files in just seconds – at an average download speed three to five times faster than today's 3G networks. Sprint 4G is capable of peak download speeds up to 10 Mbps.

- > Enjoy the nationwide coverage and speed of 3G when working outside of 4G areas
- > GPS navigation receiver
for use on 3G network (not Sprint 4G)
- > Compatible with Windows Vista and XP.
- > Simple activation

Sprint is the first national carrier to provide wireless 4G service.
