Sprint Mobile Broadband USB Modem Ovation U727™ by Novatel Wireless

Features

Mobile Broadband Network: Sprint is moving ahead of plan for the expansion and evolution of their nationwide Mobile Broadband network, now covering over 200 million people in 220 Major Metropolitan areas.

Antenna: A flip-up antenna with a "loop" design that must be extended when in use.

Micro-SD Slot: This USB modem is a 2-in-1 device that has a microSD slot providing users both Mobile Broadband connectivity and a storage drive.

Software: Simple software install for Windows OS users, because no CD required with Sprint Connection Manager "Lite", which is referenced as an "automatic" install – just insert the device and it automatically starts to load the device drivers. There will be a "Full" version of Sprint Connection Manager software provided on the CD in the box. Also, provides such features as:

- Auto-Connect (NDIS): Feature that improves interfaces with Windows for increased battery life, the ability to auto connect when the device is inserted, and a faster connection after Windows "Resumes" from "Standby" or "Hibernate" states.

- Sprint Location Services: This "FREE" feature is available with this device, using the GPS chipset embedded in the Mobile Broadband device, and the latest version of Sprint Connection Manager. Users can conduct a locate, which plots their current location on a map, and then search for nearby points of interest such as a restaurant, gas station, bank or coffee shop. Users can also enter their own custom point of interest query.

Macintosh OS users will need to review the user guide instructions located on the CD in the box before inserting this device.

Linux users, please see www.sprint.com/downloads site Linux OS support.

One-Touch Activation: The first time the user launches the software and has already set-up the device's ESN number in Sprint's billing system, the user will need to only click "Yes" at the activation prompt to complete the activation process making it easy to begin using.

Security: Employs CDMA wireless technology authentication and identification system for top-notch security.

What's in the box?

- Monitor clip with USB Cable
- Lanyard
- Carrying Pouch
- Quick Start Guide
- CD-ROM

Specifications

Digital Dual-band
Dimensions: 2.8" x 1.0" x 0.5"
Interface: ExpressCard/34
Weight: 1.12 ounces

Compatibility

- Microsoft® Windows®: 2000/XP/Vista
- Macintosh: Mac OS X
- Linux

Sprint Mobile Broadband Express Card AirCard® 597E by Sierra Wireless

Features

Mobile Broadband Network: Sprint is moving ahead of plan for the expansion and evolution of their nationwide Mobile Broadband network, now covering over 200 million people in 220 Major Metropolitan areas.

Sprint Location Services: This "FREE" feature is available with this device, using the GPS chipset embedded in the Mobile Broadband card, and the latest version of Sprint Connection Manager. Users can conduct a locate, which plots their current location on a map, and then search for nearby points of interest such as a restaurant, gas station, bank or coffee shop. Users can also enter their own custom point of interest query.

Antenna: Sierra Wireless antenna design for the AC597E is a built-in design to improve performance and eliminate any potential for antenna breakage. This device also comes with an external antenna port (jack).

Easy Software Installation - No CD Required (available 02/17/08): This device has the software onboard the device and will walk through installation whether the user is a Windows OS or Macintosh OS user. The Sprint Connection Manager software provides unique features such as Sprint Location Services and NDIS for auto-connect driver for improved interface between the device and Windows operating system.

One-Touch Activation (available 02/17/08): The first time the user launches the software and has already set-up the device's ESN number in Sprint's billing system, the user will need to only click "Yes" at the activation prompt to complete the activation process making it easy to begin using.

Security: Employs CDMA wireless technology authentication and identification system for top-notch security.

What's in the box?

- Express to PC Card Slot adapter (available 02/17/08)
- Quick Start Guide

Specifications

Digital Dual-band
Dimensions: 5.2" x 1.3" x 0.5"
Weight: <1.7 ounces

Compatibility

- Microsoft® Windows®: 2000/XP/Vista
- Macintosh: Mac OS version 10.4 or higher
- Interface: Express Card/34

Sprint Mobile Broadband Card Merlin S720™ by Novatel

Features

Mobile Broadband Network: Sprint is moving ahead of plan for the expansion and evolution of their nationwide Mobile Broadband network, now covering over 200 million people in 220 Major Metropolitan areas.

Sprint Location Services:

This "FREE" feature is available with this device, using the GPS chipset embedded in the Mobile Broadband card, and the latest version of Sprint Connection Manager. Users can conduct a locate, which plots their current location on a map, and then search for nearby points of interest such as a restaurant, gas station, bank or coffee shop. Users can also enter their own custom point of interest query.

Software: Includes Sprint Mobile Broadband Connection Manager™ software for connectivity to all CDMA networks. This includes Sprint's 1xRTT Network, Power Vision Network (Revision 0 and A) where available. This easy to install, easy-to-use software provides a common user interface across multiple mobile computing devices and self-diagnostic tools to simplify set-up, support and troubleshooting. The user of this device will be able to upgrade (for free) their software version to support basic GPS enablement sometime in 1st Qtr 2007.

- NDIS: Driver for improved interface
- between PC Card and Windows operating system.

Antenna: Novatel Wireless redesigned their antenna for the S720, which is now a flip-up where the S620 was built-in. This flip-up antenna has a unique design to improve performance and put the user at ease for the potential breakage.

Security: Employs CDMA wireless technology authentication and identification system for top-notch security. The Mobile Identification Number (MIN) and Electronic Serial Number (ESN), together with CDMA spread spectrum technology, make it virtually impossible for unauthorized users to capture and decipher messages and other sensitive information.

- Leverages CDMA 1x network within the 1900 and 800 MHz frequency.

- Designed to operate on the Sprint Power Vision Network where available.

Advanced Power Management: Operating voltage of 3.3V for optimal laptop performance and reduced battery drain.

Specifications

Dual-band
Dimensions: 4.8" x 2.0" x 0.8"
Weight: 2 ounces

Compatibility

- Microsoft® Windows®: 2000/XP/Vista
- Macintosh: Mac OS version 10.4.8 or higher
- PC Laptop with Type II PCMCIA Card slot
- Does not support PDAs

Sprint Mobile Broadband USB Modem 595U by Sierra Wireless

Features

Mobile Broadband Network: Sprint is moving ahead of plan for the expansion and evolution of their nationwide Mobile Broadband network, now reaching over 200 million people in 220 Major Metropolitan areas.

Sprint Location Services: This "FREE" feature is available with this device, using the GPS chipset embedded in the Mobile Broadband USB modem, and the latest version of Sprint Connection Manager. Users can conduct a locate, which plots their current location on a map, and then search for nearby points of interest such as a restaurant, gas station, bank or coffee shop. Users can also enter their own custom point of interest query.

Antenna: Sierra Wireless antenna design for the AC595U is a built-in design to improve performance and eliminate any potential for antenna breakage. This device also comes with an external antenna port (jack).

Software: The CD-ROM that comes in this box provides installation software for Windows OS users, which is Sprint Connection Manager and for Macintosh OS users, please use the Sierra Watcher Lite software. Sprint Connection Manager is easy to install, easy-to-use and provides unique features such as Sprint Location Services and NDIS for auto-connect driver for improved interface between USB modem and Windows operating system. Also SCM provides a common

user interface across multiple mobile computing devices and self-diagnostic tools to simplify set-up, support and troubleshooting.

One-Touch Activation: The first time the user launches the software and has already set-up the device's ESN number in Sprint's billing system, the user will need to only click "Yes" at the activation prompt to complete the activation process making it easy to begin using.

Security: Employs CDMA wireless technology authentication and identification system for top-notch security.

Battery Included: This Lithium Ion battery will provide the extra "power-boost" needed to maximize performance connection in fringe coverage and loaded network areas.

What's in the box?

- 7" USB Connection Cable
- Quick Start Guide
- CD-ROM with software (Sprint Connection Manager and Sierra Watcher Lite) and User Guide

Specifications

Digital Dual-band
Dimensions: 3.5" x 1.5" x 0.8"
Weight: <1.5 ounces

Compatibility

- Microsoft® Windows®: 2000/XP/Vista

Internal Antenna: The handset has an internal antenna.

Group Connect®: Users can instantly connect a group of people nationwide - all at once - with the Group Connect® service.

One Touch Nextel Direct Connect®: Set your phone and instantly connect to the last Nextel Direct Connect® call or an assigned Nextel Direct Connect® contact by pressing the Push-To-Send.

Nextel Direct Connect® Speaker and Privacy Modes: Use the private speaker button to switch from the external speaker to the earpiece for private conversations or to minimize disruptions in quiet environments.

Direct Talk™: The all digital off-network Direct® Connect that works anywhere, anytime between compatible phones within a range of up to 6 miles (range may vary based on terrain and conditions). Direct Talk™ provides reliable back-up communications tool in times of emergency, network outage, or when traveling to remote areas not under Nextel Coverage such as hiking, cruise vacations or inside buildings.

GPS Enabled: Features an embedded

Global Positioning System (GPS) chip necessary for utilizing the E911 emergency location services, where available. Whether you need turn-by-turn driving directions or a smarter way to manage your mobile travel needs, GPS solutions can help get it done. If you need to make a 911 emergency call, the GPS feature can also help emergency personnel locate you.

Messaging: Instantly send and receive SMS Text Messages and MMS across the room or across the country.

Vibra-call Alert: Notifies you of incoming phone calls, Nextel Direct Connect® calls, messages and Voicemail without a sound.

Recent Calls List: Access the last twenty sent and received calls for quick call return or number storage.

Downloadable Applications, Games, Ring tones and Wallpapers: Use the "Downloads" menu to choose from

hundreds of additional Java applications, games, ring tones, and wallpaper to personalize your phone.

Java Applications: Get answers at your fingertips or take a break from a hectic schedule with included applications and games.

Built-in Speakerphone: Safe, hands-free voice conversations are always available with the built-in speakerphone.

Multiple Languages: Change a setting to read phone menus and options in English and Spanish.

Removable SIM Card: Transfer contacts and services.

Specifications

800/900 MHz iDEN
Dimensions: 4.7" x 1.8" x 0.5"
Weight: 3.7 ounces
Battery Life: Up to 2.8 hours continuous digital talk time

i560 Nextel Rugged Phone by Motorola

Features

Rugged Construction: Meets Military Standard 810 F for dust, shock, vibration, temperature extremes, low pressure, and solar radiation. Performs in extreme outdoor environments and stands up to dusty environments, drops, exposure to vibration from heavy machinery use, and hot/cold climates.

Nextel Group Connect®: With this service, users can instantly connect to a group of people nationwide - all at once.

Nextel Direct Talk™: The all-digital off-network Nextel Direct Connect® that works anywhere, anytime between compatible phones (range will vary based on terrain and conditions).

Direct Talk™ provides reliable back-up communications tool in times of emergency, network outage, or when traveling to remote areas not under Nextel coverage such as hiking, cruise vacations or inside buildings.

Nextel Direct Send™: Push-to-Send contact information from your i560's contact list to other Nextel Direct Send-enabled phones...instantly!

GPS Capable: Lets you view your approximate location and when making 911 calls helps emergency personnel to locate you if your phone had adequate access to GPS satellite signal and the emergency response center is equipped to process such signals. Supports non-Java location-enhanced services such as Mobile Locator™.

Vibrant Color Display: 65K color display with enhanced clarity allows you to customize your screen with downloadable wallpapers, adjustable color palettes, and choice of three font sizes.

Java Applications: Including those from partners offering industry leading business solutions and ring tones.

Built-in Speakerphone

Nextel Direct Connect® Speaker & Privacy Modes: Use the private speaker button to switch from the external speaker to the earpiece for private conversations or to minimize disruptions in quiet environments.
