

# Make Mobility Work for You.

## **Location Based Services from Sprint let the Public Sector track, manage and direct highly mobile workforces.**

Location Based Services (LBS) use GPS devices and advanced software to enable precise, real time tracking of mobile workforces from a central location. Dispatchers can see where workers, officers and agents are, what their job status is and how to get them where they're going—fast. All this allows for shorter response times, lower fuel and maintenance costs, and reduced downtime and paperwork.

### **With LBS for the Public Sector, you can get the following benefits:**

- > Simplify dispatching. Monitor and direct workers with accurate, real time information.
- > Improve safety. Re-route vehicles around accidents and weather, get responders to incident sites faster, and access information about other agencies' resources.
- > Stay on schedule. Receive audible and visual step-by-step driving directions that adapt to missed turns and guide drivers to important locations like fuel centers.
- > Improve efficiency. Allocate resources with real-time data and historic reports.
- > Save time. Automate data capture, scheduling and dispatching processes.
- > Reduce downtime. Search databases from the field and send valuable updates to workers from dispatch or headquarters.
- > Improve visibility. Track employee location, speed, status and activities.
- > Improve analysis. Use mapping software to find patterns in data taken from the field. Useful in criminal investigations or improving operational efficiency.
- > Enable interoperability. Access and share critical data across agencies.

### **Why Sprint?**

Sprint is passing the power on to you. With great value, unmatched wireless capabilities and powerful networks, Sprint brings you more of what you need—giving you the power to do more of what you want.

### **Sprint works with industry-leading partners to bring the right solutions to the Public Sector:**

- > ActSoft Comet Tracker
- > Air-Trak
- > @road Pathway, GeoManager, Taskforce
- > GeoSpatial Technologies  
GSTTracker, GSTViewer, GST  
SMARTID and GST CrimeMap
- > TeleNavtrack
- > Xora TimeTrack
